

Joint APFM & IDMP Virtual Exchange on Community-based Flood and Drought Management - sharing of experience and learning for the future

Date: 5 June at 13:00 - 14:30 CEST

Join us in celebrating **World Environment Day 2024** with a **Virtual Exchange focused on Community-Based Flood and Drought Management**. The [Associated Programme on Flood Management](#) (APFM) and [the Integrated Drought Management Programme](#) (IDMP) aim to enhance community self-help capacities and preparedness through training and capacity development in integrated flood and drought management.

[Registration link](#)

The webinar aims to:

- Share experiences from APFM/IDMP partners on community-based drought and flood risk management approaches.
- Reflect on the main challenges and opportunities encountered in community-based flood and drought risk management over the past decades.
- Leverage APFM/IDMP experiences for future community-level flood and drought management projects.

Join us to learn, share, and collaborate on improving flood and drought management in communities worldwide.
